7. Branch of Thanh An 96 Installation and Construction Joint Stock Company in Hochiminh City	No. 221 DIII, Street III, Quarter 6, Phuoc Long B Ward, Ho Chi Minh City.

7. Declaration on the Comparability of Information in the Financial Statements

The Company has consistently applied accounting policies in accordance with the Vietnamese Accounting Regime for enterprises issued under Circular No. 99/2025/TT-BTC dated 27 October 2025 of the Ministry of Finance. Accordingly, the information and financial data presented in these Combined Financial Statements are comparable between reporting periods.

II. ACCOUNTING PERIOD AND CURRENCY USED IN ACCOUNTING

1. Annual accounting period : (From Jan 01 to Dec 31).

The accounting period for these combined financial statements beginning on April 1, 2026 and ending on June 30, 2026.

2. Accounting currency: Vietnam Dong (VND)

III. APPLICABLE STANDARDS AND REGIME

1. Applicable accounting regime

The Company applies the Vietnamese Accounting Regime for enterprises promulgated together with Circular No. 99/2025/TT-BTC dated 27 October 2025 issued by the Ministry of Finance.

2. Statement of compliance with Accounting Standards and the Accounting System

The Board of Management of the Company confirms that the Combined Financial Statements for the financial year ended 30 June 2026 have been prepared and presented in compliance with the Vietnamese Accounting Standards, the Vietnamese Accounting Regime for enterprises and relevant statutory requirements.

IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES, AND RELEVANT LEGAL REGULATIONS

The Company consistently applies the following accounting principles

1. Basis of preparation of the combined financial statements

The accompanying Combined Financial Statements are presented in Vietnam Dong (“VND”), prepared under the historical cost basis and in accordance with the Vietnamese Accounting Standards, the Vietnamese Accounting Regime for enterprises and relevant legal regulations relating to the preparation and presentation of the Combined Financial Statements.

The Company’s Combined Financial Statements are prepared by combining the financial statements of the dependent units and the financial statements of the Company’s Head Office. Transactions and balances between the Head Office and dependent units, as well as among dependent units, have been eliminated upon preparation and presentation of the Company’s Combined Financial Statements.

The accompanying Combined Financial Statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries other than Vietnam.

2. Principle for Recognizing Cash and Cash Equivalents

Cash includes cash on hand and cash at banks with no fixed term.

Cash equivalents are short-term investments with an original maturity or recovery period of not more than three (3) months from the date of acquisition, which are readily convertible into known amounts of cash and are subject to an insignificant risk of changes in value at the reporting date.

3. Accounting principles for Financial Investments

a) *Held-to-maturity investments*

Held-to-maturity investments comprise investments that the Company has the intention and ability to hold until maturity.

These investments include bank term deposits with an original maturity of more than 3 months.

Held-to-maturity investments are recognized from the date of purchase and are initially measured at purchase price plus transaction costs directly attributable to the acquisition. Interest income from held-to-maturity investments after the purchase date is recognized in the Income Statement on an accrual basis. Interest earned before the Company's acquisition is deducted from the cost at the time of purchase.

Held-to-maturity investments are measured at cost less provision for doubtful debts.

The provision for doubtful debts for held-to-maturity investments is made in accordance with current accounting regulations.

b) *Loans*

Loans are measured at cost less provision for doubtful debts. The provision for doubtful debts for the Company's loans is made in accordance with current accounting regulations.

4. Principle for Accounting Receivables

Receivables represent amounts recoverable from customers or other parties. Receivables are presented at their carrying amount less allowance for doubtful debts.

The provision for doubtful debts is assessed and recognized for receivables that are overdue and considered difficult to recover, or for receivables where the debtor is unlikely to have the capacity to pay due to liquidation, bankruptcy, or similar difficulties.

5. Principles of recognition of Inventories

Inventories are stated at the lower of cost and net realizable value. Cost of inventories includes direct material costs, direct labor costs, and general manufacturing overheads (if any) incurred in bringing the inventories to their present location and condition.

Net realizable value is determined as the estimated selling price less the estimated costs of completion and the estimated costs of marketing, selling, and distribution. Inventories are accounted for using the perpetual inventory system and costed using the specific identification method.

The provision for devaluation of inventories is recognized when there is reliable evidence of a decline in net realizable value below the cost of inventories.

6. Principles of recognition and depreciation of Fixed Assets, Finance Lease Fixed Assets, and Investment Properties

a) *Tangible Fixed Assets*

Tangible fixed assets are recognized at cost and presented at cost less accumulated depreciation. The historical cost of a fixed asset comprises all expenditures incurred by the Company to acquire the asset and bring it to a ready-for-use state.

Tangible fixed assets are depreciated on a straight-line basis over their estimated useful lives, in accordance with Circular No. 45/2013/TT-BTC dated April 25, 2013, by the Ministry of Finance providing guidance on the management, use, and depreciation of fixed assets.

Specifically, as follows:

<u>Fixed Asset Group</u>	<u>Useful Life (years)</u>
Buildings and structures	8-30
Machinery and equipment	4-10
Transportation and transmission vehicles	5-10
Management equipment and tools	4-10
Other assets	4-10

When a fixed asset is sold or disposed of, its historical cost and accumulated depreciation are derecognized, and any resulting gain or loss from the disposal is recognized as other income or other expenses in the year.

b) *Intangible Fixed Assets and Depreciation*

Land Use Rights: Includes all actual costs incurred by the Company directly related to the land area, such as: Payments for land use rights, compensation for site clearance, land leveling, and registration fees.

Definite land use rights are presented at cost less accumulated amortization.

Indefinite land use rights (Permanent land use rights) are not amortized.

Quarrying and Mining Rights: Includes all actual costs incurred by the Company related to the rights to exploit stone and soil quarries. Includes all actual costs incurred by the Company related to the rights to exploit stone and soil quarries.

Accounting Software Initially recognized at purchase price and amortized on a straight-line basis over its estimated useful life.

Specific Amortization of Intangible Fixed Assets Intangible fixed assets, including the quarrying rights at Suoi Mo quarry, land use rights, accounting software, and mining rights at Hoc Tra quarry, are amortized on a straight-line basis over 7 years, 4 years, and 2 years and 3 months, respectively.

Specifically, the permanent land use rights at No. 221 DIII, Street III, Quarter 6, Phuoc Long Ward, Ho Chi Minh City, are not amortized.

7. Principle for Construction in Progress

Assets in the course of construction for production, rental, administration, or any other purposes are recognized at cost. This cost includes service costs and relevant borrowing costs in accordance with the Company's accounting policies. Depreciation of these assets, on the same basis as other assets, commences when the assets are in a ready-for-use state.

8. Principle for Prepaid Expenses

Long-term prepaid expenses include costs of machinery and office equipment not qualifying for recognition as fixed assets, costs of tools and supplies, pending repair costs, and other long-term prepaid expenses.

Long-term prepaid expenses related to tools and supplies are initially reflected at cost and amortized on a straight-line basis over a maximum period of 3 years.

9. Principles of Accrued Expenses

Accrued expenses are expenses that have not actually been incurred but are pre-calculated into production and business costs during the period. This ensures that when the actual expenses arise, they do not cause sudden fluctuations in costs, based on the matching principle between revenue and expenses. When actual expenses occur, any difference from the accrued amount is adjusted by recording an increase or decrease in expenses accordingly.

10. Principles and Methods of Recognizing Provisions for Liabilities

The recognized value of a provision for liabilities is the best estimate of the amount required to settle the present debt obligation at the end of the annual accounting period or the interim accounting period.

Only expenses related to the initially recognized provision shall be offset by that provision. The difference between the unused provision from the previous period and the provision required for the current reporting period is reversed as a reduction in production and business costs, except for the reversal of excess construction warranty provisions, which is recognized as other income in the period.

11. Principle for Accounting Payables

Payables are monitored in detail by payment due dates, creditors, and other factors as required for the Company's management purposes.

Payables include trade payables, borrowings, and other payables that are almost certain in value and timing and are recognized at no less than the amount required to be settled. They are classified as follows:

+ Trade payables: Amounts payable of a commercial nature arising from transactions for the purchase of goods, services, or assets between the Company and suppliers.

+ Other payables: Amounts payable that are non-commercial in nature and not related to transactions for the purchase and sale of goods or services.

12. Accounting Principles for Borrowings

Borrowings include loan amounts but exclude loans in the form of bond issuance or redeemable preference shares that require the issuer to repurchase them at a specified future date.

The Company monitors borrowings in detail by each creditor and classifies them as short-term or long-term based on the repayment period.

Costs directly attributable to borrowings are recognized as finance expenses.

13. Principles of Recognition and Capitalization of Borrowing Costs

All borrowing costs are recognized in the combined Income Statement when incurred, except when they are capitalized in accordance with the Accounting Standard "Borrowing Costs".

14. Principles of Recognition of Unearned Revenue

Unearned revenue includes amounts pre-paid by customers for one or more accounting periods regarding asset rentals. Each period, unearned revenue is determined and transferred to Revenue in the period corresponding to the lease term.

15. Principles of Recognition of Owner's Equity

Owner's contributed capital is recognized at the actual amount of capital contributed by the owners.

Retained earnings are determined based on the Company's results of operations after corporate income tax and profit distribution.

After-tax profit is appropriated for dividend payments to shareholders and allocations to funds upon approval by the General Meeting of Shareholders at the Company's Annual General Meeting.

Dividends are recognized as a liability upon approval by the General Meeting of Shareholders.

16. Principles and Methods of Recognition of Revenue and Other Income:

a) Construction Contract Revenue

When the outcome of a construction contract can be estimated reliably:

For contracts where the Contractor is paid based on the value of the performed volume, revenue and costs related to the contract are recognized corresponding to the completed work portion confirmed by the customer and reflected on the issued invoices.

Increases or decreases in construction volume, compensation, and other receipts are only recognized as revenue when agreed upon with the customer.

b) Interest, Dividends, Shared Profits, and Other Income

Revenue is recognized when it is probable that the Company will obtain economic benefits from the activity and the amount can be measured with reasonable certainty.

17. Principles of Cost of Goods Sold

Includes construction and installation costs recognized in correspondence with revenue during the year.

18. Principles and Methods of Recognition of Financial Expenses

Borrowing costs: Recognized monthly based on the loan amount, interest rate, and the actual number of borrowing days.

19. Principles and Methods of Recognition of Corporate Income Tax Expenses

Corporate Income Tax Expenses: Represent the total of current CIT expenses and deferred CIT expenses (or current CIT income and deferred CIT income) when determining the profit or loss for a year.

Current Corporate Income Tax Expense: The amount of CIT payable calculated based on the taxable income for the year and the current CIT rate. Taxable income differs from accounting profit due to adjustments for differences between accounting profit and taxable income in accordance with current tax policies.

Tax Rate: The Company is obligated to pay CIT at a rate of 20% on taxable income.

The determination of the Company's income tax is based on current tax regulations. However, these regulations change over time, and the final determination of CIT depends on the results of examination by the competent Tax Authorities.

20. Related Parties

Parties are considered to be related if one party has the ability to control or exercise significant influence over the other party in making decisions regarding financial and operating policies. Parties are also considered related if they are subject to common control or common significant influence.

In considering each possible related party relationship, attention is directed to the substance of the relationship rather than merely the legal form.

V. ADDITIONAL INFORMATION FOR ITEMS PRESENTED IN THE BALANCE SHEET

1. Cash and cash equivalents

Unit: VND

Cash and cash equivalents held by the enterprise that are not restricted for use	30/06/2026	01/01/2026

Re: Explanation of the Reason for the
Difference of More Than 10% in Profit
After Tax in the Q2/2026 Financial
Statements Compared with the Q2/2025
Financial Statements

To:

- The State Securities Commission;
- Hanoi Stock Exchange.

SOCIALIST REPUBLIC OF VIETNAM

Independence – Liberty – Happiness

Da Nang, July 29th, 2026

According to Circular 96/2020/TT-BTC guiding the disclosure of information on the stock market, listed companies must explain that the profit after CIT of the reporting period changes by 10% or more compared to the same period of the previous year.

In the financial statement of the second quarter of 2026 of Thanh An 96 Construction and Installation Joint Stock Company, the profit after tax is: 5.796.301.682 VND, down more than 22,1% compare to the second quarter of 2025 (7.443.517.600 VND).

Thanh An 96 Construction and Installation Joint Stock Company explain that the profit after tax in the second quarter decreased compare to the same period last year as follows:

In the second quarter of 2026, the Company deploys forces, focusing on organizing the construction of works to ensure progress according to the contract signed with the investor. The company focuses on and is active in the preparation of acceptance and settlement documents for projects. However, certain construction items have not yet reached the stage for acceptance, and the execution and signing of project documentation for a number of projects have been delayed because they are located in remote and mountainous areas, making the transportation of documents particularly difficult... Therefore, in the second quarter of 2026, the value of sales and service provision revenue is 23,5% lower than the value compare to the same period last year (705,1 billion VND/921,1 billion VND). The ratio of cost of goods sold to net revenue is relatively stable.

Therefore, the main reason for the decrease in profit after tax in the second quarter of 2026 by 22,1% compared to the same period last year was the decrease in

sales and service revenue in the period and the decrease in revenue from financial activities compared to the same period last year.

Thanh An 96 Construction Joint Stock Company explained to the State Securities Commission, the Hanoi Stock Exchange and investors.

Sincerely!
